WHAT PEOPLE SAY

Actual Feedback from Customers

UK - *Awesome bit of kit.*

UK - *Straightforward purchase and the product did exactly what it said on the packet Brilliant idea*

Germany - *Great thing, this repair kit. Super fast delivered, unpacked and then installed according to instructions. After 20 minutes, everything was done and the loose kitchen cupboard door was again bombproof. Really recommended.*

USA - *installed the hardware today, it works amazingly! Super easy. This stuff needs to be in every contractors hands*

USA - *Great hidden hinge repair kit! None of the building supply stores, or hardware stores have anything like this, works as advertised. I highly recommend this product! Prompt shipping & delivery.*

USA - *These things are AMAZING!!!*

**We are based in Oxfordshire
and our product is manufactured locally, in the UK!**

Our Packaging is 100% Recyclable!

Same-day Drop-Ship for mail-order available!

Gidgit™

The OLD TECH METAL PLATE

1. Not all cabinets are pre-drilled in the same location so with the metal plate you are forced to use their hole centres.
2. Again, Not all cabinets are pre-drilled in the same location so with the metal plate, you have no flexibility of where to place new screws.
3. Wood screws are not the correct solution for Chip/Particle Board and will just further damage the carcass.

THE GIDGIT DIFFERENCE

Gidgit™

1. Our brackets allow you to place the bracket into the hole location of the original hinge.
2. Our NEW Design bracket allows you to adjust the distance between the holes if the hinge has not been centred, by simply splitting the bracket in two.
3. We supply modern Euro/Cabinet Screws as used by most modern manufacturers including IKEA® for proper mechanical fit.
